

# STRENGTHENING THE ENERGY GRID IN YOUR COMMUNITY

To enhance the reliability of energy service for customers in the area, we will be making improvements to the energy grid near your home or business.

**Upcoming Reliability Work in Cape May  
Beginning October 2021**

An Exelon Company

## The Cape May Substation Reliability Project will include:

- Replacing an existing substation in Cape May with a modern, state-of-the-art facility that is better prepared to handle more extreme weather and improve service reliability for customers.
- Rebuilding a critical section of a transmission line between Cape May and West Cape May with stronger, more modern equipment to reduce the impacts of severe storms, leading to fewer storm-related outages.

## During construction, we are committed to minimizing impacts to the local community.

- We typically perform our work on weekdays during normal business hours (generally 8 a.m. to sundown).
- We will keep noise levels from construction activities within established thresholds.
- We will restore all areas affected by construction.

Please note, schedules may change based on inclement weather.

We appreciate your patience as we complete this important work. If you have any questions regarding this project, please contact us at our dedicated project phone number **609-909-3930** or email address **[CMSubReliability@exeloncorp.com](mailto:CMSubReliability@exeloncorp.com)**.
